Learning outcomes for the dental team

- **To explore new applications that can assist in oral health care for vulnerable adults**
- **To understand how Cognitive Behavioural Therapy can help dentally anxious and phobic patients**
- **To learn about sensory input deficiency in patients with Autistic Spectrum Disorder**
- **To receive SIG dysphagia and oral health care guidelines**
- **To experience the e-learning package for carers that has been developed by BSG/BSDH**
- **To have an update on new oral health care products that would benefit vulnerable children and adults**
- **To learn about the all Wales 1000 Lives project regarding mouthcare for adults in hospital**
