

The meeting will focus on quality of end of life care and what we, as the dental team, can do to improve this for older patients.

Overall Aims:

- Understand the social aspects of ageing
- Describe health care for frail older living in the community
- To receive the survey results of the oral health of residents in care homes
- Practical approach to restoring the older tooth
- Understand the aetiology of denture stomatitis and how to manage it
- Update on the new materials used for making dentures
- Understand the role of the new clinical dental technician
- Awareness of the issues for older people undergoing minor oral surgery

**BRITISH SOCIETY
OF
GERODONTOLOGY**

The aim of the society is to protect, maintain and improve the oral health of older people by providing a forum to further knowledge and increase awareness relating to oral health, dental needs and treatment for the benefit of older adults.

The society holds two meetings per year when members of different dental specialities and dental care professionals come together to consider and exchange information on the oral health care of older people.

BSG is also involved in the development of undergraduate and postgraduate teaching in Gerodontology. It motivates and fosters relations with other health care professionals, care workers, charitable organisations, voluntary agencies and carers for the benefit of older people, thereby enhancing health promotion. Full membership of BSG includes a subscription to the Society's scientific journal 'Gerodontology'.
